

Only NobelGuide™ gives you beautiful Teeth-in-an-Hour™

Everyone deserves a beautiful smile. Today there is no need to settle for anything less. The NobelGuide™ system means you can now replace missing teeth with permanent dental implants – easily, quickly, and comfortably.

This gentler new option enables you to leave the dentist's office with fully functioning new teeth after just one treatment!

simple and quick

NobelGuide™ is a unique system that has numerous advantages over traditional implant treatment. Not only does it reduce the number of visits to your dentist, you also spend less time there, greatly shortening your treatment time.

Best of all, NobelGuide™ treatment is minimally invasive, so no recovery period is needed after your treatment. You can return to your active life immediately.

"You can laugh again. It stays in place. You feel more reassured. Everything feels safer, one's entire behaviour changes. There were no problems at all. Wonderful!"

–Enge Eberspacher

Teeth-in-an-Hour™

The NobelGuide™ system is a sophisticated tool your dentist may use for precision planning of your treatment, so your implants are accurately and safely placed in exactly the right place.

With conventional treatment you have to wait for your implants to heal before the teeth are placed, which can take several months. Teeth-in-an-Hour™ procedure gives you your new teeth immediately. You will be able to eat immediately or soon after the treatment.

only one appointment

In most cases you only need to come in once before the actual treatment.

- Examination: First, we make a model or digital image of your mouth.
- Placing the implants: At your next appointment the new implants and teeth can be placed right away.

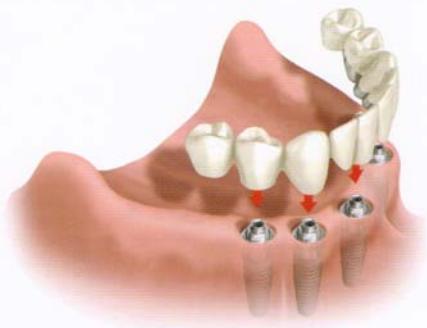

"I can laugh and sing again without having to be afraid that my plate could fall out. It's just like having my own teeth."

– Karl Heinz Berndt

**Now you can have
Teeth-in-an-Hour™**

a beautiful smile

Choose our Procera[®] ceramic crown and you'll have the ultimate beautiful smile. Procera[®] crowns look so much like your natural teeth, people will have a hard time telling them apart. Procera[®] crowns are custom-made just for you, incredibly strong and beautiful, and have a precision fit.

look younger

When you lose your teeth, your jawbone can shrink – making you look older. Implants help stabilize bone levels after tooth loss.

eat whatever you want

Like natural teeth, your new teeth are strong, stable, and secure, so you can comfortably eat all your favorite foods.

a life-long solution

Nobel Biocare dental Implants are a long-lasting solution – often for life.

a happier life

Beautiful new teeth can give you back the confidence you may have lost. They can transform your daily life!
